NEUROAI HEALTHCARE

Treatment Response Prediction Report

PATIENT INFORMATION

Basic Details

Patient Name:	Pratiksha Khandbahale
Age:	1 years
Gender:	Female
Date of Birth:	2025-10-02
Report Generated:	October 01, 2025 at 04:23 PM
Report ID:	RPT-806B4B18

EEG ANALYSIS & PREDICTION RESULTS

EEG Data Analysis

EEG Image File:	eeg_5acb9ed0-f0a4-4723-9806-cd184d8d06e5_img_0.png
Analysis Date:	October 01, 2025 at 04:23 PM
Model Used:	Deep Learning CNN Architecture
Input Resolution:	380x380 pixels
Analysis Type:	Treatment Response Prediction

PREDICTION OUTCOME

PREDICTION: Responder

Prediction Result:	**Responder**
Confidence Level:	**99.98%**
Raw Model Output:	**0.5415**
Enhanced Probability:	**0.6038**
Model Status:	**Original**
Analysis Timestamp:	**2025-10-01T16:23:12.030291**

EMOTION RECOGNITION RESULTS

Status	Error
Error Message	Emotion prediction failed: Exception encountered when calling Functional. ■[1mInput 0 of layer "conv1_conv" is incompatible with the layer: expected Arguments received by Functional.call(): • inputs=tf.Tensor(shape=(1, 128, 128, 1), dtype=float32) • training=False • mask=None • kwargs=<class 'inspect._empty'>
Model Status	Not available

CLINICAL INTERPRETATION

POSITIVE TREATMENT RESPONSE INDICATED

Based on the comprehensive EEG analysis, this patient demonstrates neural patterns consistent with positive treatment response. The AI model has identified specific biomarkers that suggest a 100.0% probability of successful therapeutic intervention.

Clinical Recommendations:
• Proceed with standard treatment protocols
• Monitor patient response closely during initial phases
• Consider this patient as a good candidate for therapeutic intervention
• Regular follow-up assessments recommended

Technical Details:
The analysis utilized advanced deep learning algorithms trained on extensive EEG datasets to identify neural signatures associated with treatment responsiveness. The high confidence level (100.0%) indicates strong statistical reliability of this prediction.

TECHNICAL SPECIFICATIONS

AI Model Details:
• Model Type: Convolutional Neural Network (CNN)
• Training Data: Extensive EEG dataset with treatment response outcomes
• Input Resolution: 380x380 pixels
• Model Status: Original
• Analysis Date: October 01, 2025 at 04:23 PM

Confidence Metrics:
• Raw Model Output: 0.5415
• Enhanced Probability: 0.6038
• Final Confidence: 99.98%

Disclaimer:
This AI-assisted prediction is intended to support clinical decision-making and should be used in conjunction with professional medical judgment, patient history, and other diagnostic methods. The prediction is not a substitute for comprehensive medical evaluation and should be considered as one factor among many in treatment planning.
